DETAILED ACTION

STATUS OF THE CLAIMS

1. Claims 1, 8, 9, 11-13, 15, 16, 18-20 and 22 were previously pending as per the previous office action.
2. The 101 rejections of the previous action are withdrawn.
3. Claims 1, 8, 9, 11-13, 15, 16, 18-20 and 22 are currently pending.
4. Claims 1, 8, 9, 11-13, 15, 16, 18-20 and 22 are allowed.

EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE

Prior art was found which disclosed:

In an initiating system, a method for establishing a new group identity with a group identity information document comprising:

creating group identity information for inclusion in the group identity information document; and

generating a self-signed group identity information document comprising the group identity information, an embedded use policy that expresses a privacy policy providing instructions as to how the group identity information may be used, wherein the embedded use policy is stored with the group identity information, at least a first key, and a group identity information document signature signed using a second key associated with the first key in the identity information document.

sending the group-signed group identity information document to a receiving system to establish the new group identity at the receiving system.

The following is examiner's statement of reasons for allowance:

The prior art of record does not teach or render obvious the limitations as recited in independent claims 1, 9, and 16 of the currently submitted claims, specific to:

"generating a self-signed personal certificate using the selection of personal identity information, wherein the self-signed personal certificate establishes the originator's personal identity, and wherein the self-signed personal certificate is signed by the originator;

attaching the self-signed personal certificate to a first message for sending to the first receiving system;

determining whether to attach, to the first message, a first group-signed membership certificate with the self-signed personal certificate, wherein the first group-signed membership certificate is group-signed by the first group owner, and wherein the first group-signed membership certificate establishes the originator's membership identity in the first group;

when the first group-signed membership certificate is to be attached to the first message:

attaching the first group-signed membership certificate with the self-signed personal certificate to the first message for sending to the first receiving system;

determining whether to attach, to the first message, an additional membership certificate with the first group-signed membership certificate and the self-signed personal certificate; and

when no additional membership certificate is to be attached, sending the first message with the attached self-signed personal certificate and the attached first group-signed membership certificate to the first receiving system."

Claims 8, 11-13, 15, 18-20 and 22 depend on independent claims 1, 9, and 16. Dependent claims are allowable as they depend from an allowable independent claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance".
